CONTENTS OF VOLUME 3

Number 1, June 1973

James D. Hays and Theodore C. Moore. CLIMAP Program 1

Nicklas G. Pisias, J. Paul Dauphin, and Constance Sancetta. Spectral Analysis of Late Pleistocene–Holocene Sediments 3

John Imbrie, Jan van Donk, and Nilva G. Kipp. Paleoclimatic Investigation of a Late Pleistocene Caribbean Deep-Sea Core: Comparison of Isotopic and Faunal Methods 10

Nicholas John Shackleton, and Neil D. Opdyke. Oxygen Isotope and Palaeomagnetic Stratigraphy of Equatorial Pacific Core V28-238: Oxygen Isotope Temperatures and Ice Volumes on a 10^5 Year and 10^6 Year Scale 39

Boaz Luz. Stratigraphic and Paleoclimatic Analysis of Late Pleistocene Tropical Southeast Pacific Cores (with an Appendix by N. J. Shackleton) 56

Harvey Maurice Sachs. North Pacific Radiolarian Assemblages and their Relationship to Oceanographic Parameters 73

Harvey Maurice Sachs. Late Pleistocene History of the North Pacific: Evidence From a Quantitative Study of Radiolaria in Core V21-173. 89

Ted C. Moore, Jr. Late Pleistocene–Holocene Oceanographic Changes in the Northeastern Pacific 99

Constance Sancetta, John Imbrie, and N. G. Kipp. Climatic Record of the Past 130,000 Years in North Atlantic Deep-Sea Core V23-82: Correlation with the Terrestrial Record 110

W. F. Ruddiman and A. McIntyre. Time-Transgressive Deglacial Retreat of Polar Waters from the North Atlantic 117

S. Stephen Streeter. Bottom Water and Benthonic Foraminifera in the North Atlantic—Glacial–Interglacial Contrasts 131

Michael L. Bender, F. T. Taylor, and R. K. Matthews. Helium–Uranium Dating of Corals from Middle Pleistocene Barbados Reef Tracts 142

R. K. Matthews. Relative Elevation of Late Pleistocene High Sea Level Stands: Barbados Uplift Rates and their Implications 147

Errata 154

Number 2. August 1973

George H. Denton and Wibjörn Karlén. Holocene Climatic Variations—Their Pattern and Possible Cause 155

H. B. S. Cooke. Pleistocene Chronology: Long or Short? 206

J. Chappell. Astronomical Theory of Climatic Change: Status and Problem 221

Alan L. Bryan. Paleoenvironments and Cultural Diversity in Late Pleistocene South America 237

W. A. Watts. The Vegetation Record of a Mid-Wisconsin Interstadial in Northwest Georgia 257

Claude W. Hibbard and Walter W. Dalquest. *Proneofiber*, a New Genus of Vole (Cricetidae: Rodentia) from the Pleistocene Seymour Formation of Texas, and its Evolutionary and Stratigraphic Significance ... 269

John C. Frye. Pleistocene Succession of the Central Interior United States 275

Calvin J. Heusser. Environmental Sequence Following the Fraser Advance of the Juan de Fuca Lobe, Washington 284

M. J. Dudas, M. E. Harward, and R. A. Schmitt. Identification of Dacitic Tephra by Activation Analysis of Their Primary Mineral Phenocrysts 307

Number 3, October 1973

THE ECOLOGICAL ROLE OF FIRE IN NATURAL CONIFER FORESTS OF WESTERN AND NORTHERN AMERICA

Papers resulting from the symposium held at the annual meetings of the Ecological Society of America and the American Institute of Biological Sciences, at the University of Minnesota in August 1972

Guest Editors

H. E. Wright, Jr. and M. L. Heinselman

M. L. Heinselman and H. E. Wright, Jr. Preface 317

H. E. Wright, Jr. and M. L. Heinselman. The Ecological Role of Fire in Natural Conifer Forests of Western and Northern North America—Introduction 319

Miron L. Heinselman. Fire in the Virgin Forests of the Boundary Waters Canoe Area, Minnesota 329

Albert M. Swain. A History of Fire and Vegetation in Northeastern Minnesota as Recorded in Lake Sediments 383

Sidney S. Frissell, Jr. The Importance of Fire as a Natural Ecological Factor in Itasca State Park, Minnesota 397

James R. Habeck and Robert W. Mutch. Fire-Dependent Forests in the Northern Rocky Mountains 408

Lloyd L. Loope and George E. Gruell. The Ecological Role of Fire in the Jackson Hole Area, Northwestern Wyoming 425

J. S. Rowe and G. W. Scotter. Fire in the Boreal Forest 444

Leslie A. Viereck. Wildfire in the Taiga of Alaska 465

Bruce M. Kilgore. The Ecological Role of Fire in Sierran Conifer Forests. 496

NUMBER 4, DECEMBER 1973

H. E. WRIGHT, JR. Guest Editorial 515

DAVID M. HOPKINS. Sea Level History in Beringia During the Past 250,000 Years 520

RICHARD L. HAY. Lithofacies and Environments of Bed I, Olduvai Gorge, Tanzania 541

GIFFORD H. MILLER. Late Quaternary Glacial and Climatic History of Northern Cumberland Peninsula, Baffin Island, N.W.T., Canada 561

JAMES B. BENEDICT. Chronology of Cirque Glaciation, Colorado Front Range 584

CUCHLAINE A. M. KING AND DONALD R. COATES. Glacio–Periglacial Landforms within the Susquehanna Great Bend Area of New York and Pennsylvania 600

DONALD R. WHITEHEAD. Late-Wisconsin Vegetational Changes in Unglaciated Eastern North America 621

VALMORE C. LAMARCHE, JR. Holocene Climatic Variations Inferred from Treeline Fluctuations in the White Mountains, California 632

CALVIN J. HEUSSER AND LINDA E. FLORER. Correlation of Marine and Continental Quaternary Pollen Records from the Northeast Pacific and Western Washington 661

ALAN D. HECHT. Faunal and Oxygen Isotopic Paleotemperatures and the Amplitude of Glacial/Interglacial Temperature Changes in the Equatorial Atlantic, Caribbean Sea and Gulf of Mexico 671

QUATERNARY RESEARCH

An Interdisciplinary Journal

EDITORIAL POLICY

Quaternary Research is devoted to *interdisciplinary* articles dealing with the Quaternary Period. Editorial policy requires that articles must be of broad interest, of basic significance to more than one discipline, and of high merit. Previously unpublished research results, comprehensive reviews of a field of knowledge, and occasional English translations of outstanding articles in other languages will all be considered. Generally, articles should be in English, but a small proportion of articles in French, German, or Russian will be accepted. Articles should not exceed 5000 words, but exceptions can be made for especially significant contributions. All articles will be reviewed by at least two referees.

Manuscripts and figures should be submitted at least in duplicate (a third copy could speed processing) to:

Quaternary Research
Editorial Office
University of Washington
Seattle, Washington 98105

INSTRUCTIONS TO AUTHORS

General Instructions

Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and Style. Manuscripts should be concise but detailed enough to permit critical appraisal. They should be typewritten and double-spaced throughout (including tables, legends, and footnotes) on one side of approximately 22- × 28-cm (8.5- × 11-in.) paper with 2.5-cm (1-in.) margins. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely. The title page should include the article title, author(s), affiliation(s) and address(es), and suggestions for index entries. Addresses should include zip codes or postal districts when applicable. All correspondence regarding the manuscript will be made with the person submitting the manuscript.

Authors are requested to include an Abstract (50-200 words, typed on a separate page following the title page). The Abstract should be a concise and informative summary that can be copied verbatim by bibliographers. The title must be suitable for indexing.

Units. Metric units should be used throughout, with English equivalents in parentheses if originally given in English units. When used in conjunction with numerals, units should be abbreviated and unpunctuated (e.g., cm, g, %). Use the American Chemical Society Handbook as a guide.

Footnotes. Footnotes in the *text* should be identified by superscripts consisting of Arabic numerals and should be typed on a separate sheet; footnotes in the *tables* should be identified by superscripts consisting of the lower-case letters a, b, c, etc., and placed at the bottom of the table.

Tables. Tables should be denoted by Arabic numerals and be cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. *Units must be clearly indicated for each of the column entries in the table.*

Figures. All figures should be denoted by Arabic numerals and cited consecutively in the text, with figure legends typed on a separate sheet. Units should be clearly indicated in the figures themselves.

Please Note: All figures are to be submitted in such form as to permit photographic reproduction without retouching or redrawing, including the lettering. Lettering is reproduced as part of the photoengraving and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, if possible no larger than 22- × 28-cm (8.5- × 11-in.) overall. The lettering should be large enough to allow a 50% reduction. High-quality glossy prints are acceptable for drawings and required for photographs. Color plates or fold-out illustrations cannot be accommodated unless financed by the author.

References. References should be cited in the text by author's surname and date such as "Doe (1970) reported that . . ." ". . . as previously reported (Doe *et al.*, 1970)." Suffixes (a, b, etc.) should be used to distinguish two or more works by the same author(s) in the same year; *e.g.*, Doe (1971a, 1971b). *Page numbers should be given whenever practicable.* A direct quotation should always be page referenced; a paraphrased statement should be page referenced if the article exceeds 10 pages. The reference section should be arranged alphabetically according to the author's surname. Order of items: author(s), date of publication, title of article, journal or book title (written out in full rather than abbreviated), volume number, inclusive pages, and (for books only) publisher and city, e.g.:

ZIN, S. (1971a). The problem of Quaternary climatic changes. *Quaternary Research* **1**, 1–10.

FALK, B., and LI, M. (1972). "The Cause of Quaternary Climatic Changes." Vol. 1. Academic Press, New York.

COHEN, R. (1967). The equatorial ionosphere. *In* "Physics of Geomagnetic Phenomena." (S. Matsushita and W. H. Campbell, Eds.), Vol. 1, pp. 561–613. Academic Press, New York.

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying galley proof.
